

An aerial photograph of a water treatment facility. In the foreground, a large green corrugated metal building with a gabled roof is visible. To its right, a row of several large green cylindrical storage tanks is lined up. In the background, there is a smaller red brick building, a white car, and a dirt road. A river flows through the landscape in the distance, surrounded by green fields and trees. The sky is clear and blue.

SVwater

A partnership between Stornoway and Veolia

Integrated solutions
for water and wastewater assets

About Us

SV Water is a partnership between two well respected and experienced companies in the Australian water industry.

Stornoway is a Tasmanian owned and operated business, with a proven track record in providing infrastructure maintenance and management services in Tasmania.

Veolia is an internationally recognised world leader in the water treatment and technology services sector.

Bringing together our two organisations provides unsurpassed experience, support and service to the water industry within Tasmania.

All working within a values-driven, safety focused culture.

Services we provide

SV Water has been formed to provide services to the Tasmanian water industry across all sectors.

- Operations and maintenance
- Project management
- Design and construction of water and wastewater treatment plants
- Pipeline inspection, cleaning and repair
- Biosolid management
- Sludge removal and management.

Quality is assured
